

# Behind the Project: A Philosophy of Systems that Reason and Remember.

A screenshot of a website titled "Digital Rain Technologies". The main heading is "\$ whoami" followed by the tagline "Building systems that reason and remember." underlined in brown. Below the tagline, there are navigation links for "Services", "Centrifentes", "Project Technelogid", and "Developments rfromm". The URL in the address bar is "http://sogno.it".

## Creator

Augustin Chan

## Background

Before AI, I spent 10 years at Informatica building master data management systems for enterprises across APAC and Europe...systems need to be robust before they can be clever.

## Current Focus

DSPy optimization, RAG pipelines, agent orchestration, Postgres-native architectures.
